

2003-02-06

Dear Racers and Enthusiasts

Welcome to another busy year for EFRA. We certainly have a packed race calendar for 2003, featuring European Championships being hosted on some great tracks in Austria, Switzerland, Portugal, Luxembourg, England, Norway and France.

The Executive committee have just met to finalize the details for the year and program ahead. With a schedule of 39 events to take care of, on at least one level or another, the EFRA section Chairmen have a busy year in front of them.

The 2003 EFRA Handbook, which has now become a worldwide reference manual for our sport, is at the publishers and should be printed and be available very soon. Please keep an eye on our web site for the latest information and availability.

It is very encouraging for us to realize increasing activity in our countries for Electric Off Road. Also we are happy to be experiencing very strong demand for allocations to race at the very first European Championships for the 1/10 IC 200mm class. This is all good news for the sport.

The EFRA committee looks forward to welcoming drivers to one of the events this year. I am hoping that when our member countries gather in Croatia at the beginning of November for our big annual meeting, that we will be able to reflect on a vintage year of R/C car racing in Europe.

I hope that you all gain much pleasure from the racing in 2003.

Gary Culver  
President
