

Race Report from Fiorano Italy September, 22 -24, 2006

Jody Sheckter Minidrom: If you arrive in Fiorano at the track Minicar, then firstly you are astonished only. Generous premises, very tended runway with outlined lawns (cutted natural), interesting track guidance, to drive despite curves extremely fast. Infrastructure of the finest one like generous aluminum tables for at least 100 drivers, all floors are laid out with base plats, free WLAN InterNet use at the entire place.

A view into the technical inspection room where nothing is missing and regardless of the cleanliness and order there could be also served a dinner.

The area and each room are supervised with very well releasing webcams and the associated facility is in the time keeping room.

Of everything one thought also there. Apart from time lap counting, which is an absolute must, there are also frequency scanners, indicating panel controls, radio microphone system, uninterruptible power supplies, several printers in colour as also black/white, copier, 19 inch flat screens, newest PC are furnished with identical XP setup, as if you would be in a laboratory thus simply perfect.

Organisation – consummate Teamwork: Angelo Gesualdi with his wife and son and his friends are working all day long to provide the welfare of the drivers. Gladly everything happens without hecticness with in the best way handled organizational manner and with much sympathy, where the feeling gives, to be really welcome and one sees also, everyone is.

Perfetto Angelo - grazie

The race: Beautiful weather, warmly, sunny with blue sky from Friday to Sunday. Altogether 22 driver 1/10 scale arranged in three groups and 62 drivers 1/8scale put into 7 groups. After two timed practice rounds on **Friday** afternoon followed by four qualification rounds on **Saturday**. The direct 4 qualified reached all 20 laps and to be in the first 22 had to be driven 19 laps. The group 10 was a pure Italian heat and if it's their turn the progression of speed was noticeable. Just Andreas Hammerl could drive into the first 10, besides heat 10 arranged it among themselves.

Final: Quite many spectators border now the track, all want to see the main final, and there we are also curious. 10 Italians drive their internal "EFRA" championship. Actually there was not anything unusual till the 15th minute, except that 15.5 seconds lap times are driven from all of the 10. Best lap 15.375 has been driven by Collari.

Solaroli and Collari are more or less equal from 16th minute and overtook each other spectacularly. A lot of ranking changes due to refuelling and tyre replacements in the 25th but from this time Collari was in leading position followed by Salemi, Solaroli and Pirani. 5 minutes before end Collari almost a lap in advance, on position 2 Salemi then Pirani then Christiani and on 5th position Solaroli are all in the same lap. Remaining finalists are then some laps behind. The last 2 minutes Salemi, Christiani and Pirani are in the same second, but in the last laps Pirani runs out of fuel and Solaroli could catch the 4th place. Collari wins the race with 166 laps.
