

EUROPEAN FEDERATION OF RADIO OPERATED MODEL AUTOMOBILES

European Championship Electric track 1/12th in Esklistuna/Sweden

Inauguration

Andy Moore wins the European Champion in 1:12 and 17 year old Alexander Hagberg (Sweden) becomes the Junior European Champion.

At the last weekend in March the Swedish club MK Eskil organised the European Championship in 1:12 Electric.

95 drivers from 11 European countries entered the race which was very well organised with a perfect permanent track.

Andy Moore became the top qualifier and won the to first finals. In the third final there was a battle between Marc Fischer and Alexander Hagberg about the second place. Alexander suffered from a stop & go after a jump start and was the last driver out on the first lap.

After a brilliant drive he almost managed to overtake Marc on the last lap, but Marc could defend his position and finished the championship as runner up with Alexander on third place.

A questionnaire was made the last day of the race, and showed that the event was very appreciated by the drivers and their mechanics.
