Re: GRP Large Scale Formular tires

Dear Drivers, dear Organisers!

It came to my attention that the GRP F1 tires do not comply with the EFRA rules. The front tire is too narrow (55mm instead of 60mm) and the front and rear rims also have a problem.

The tire is glued to a 110mm rim.

As the season already started and to avoid financial losses for drivers, the LS Section Chairmen have accepted for the season 2011 the following solution from GRP Gandini:

Rubber ring

W55 front

W66 rear

With the mounted rubber ring the rim size outside is according to the rules. The front tire with mounted ring is now 60mm. No other rule will be effected or modified.

With best regards

EFRA, General Secretary  
Willy Wuyts
