

Communiqué

Brussels, 22.05.2005

After consulting with members of the executive and seen the exceptional actual situation and the time frame, it has been decided as follows:

The application of the conditions to allow bodies described under Rule 12.1 of appendix 3 to the 2005 EFRA handbook has been suspended till the next Annual General Meeting of EFRA.

The suspension and the temporary authorisation for use of the hereunder-listed bodies take full effect as from June the 1st 2005 and will remain in full force till December 31st 2005, or until otherwise decided at the EFRA general meeting.

Being listed here for 2005 does not constitute or grant any right whatsoever to manufacturers to have their products retained for 2006. Proceedings to have bodies homologated for 2006 are NOT suspended.

Exceptionally new bodies can be added to this list until the 1st of July 2006 if approved by the section chairman who will consult on a confidential and proprietary basis a number of experienced persons from different nations as sole and undisputable condition.
