Important Notification for the EC-40+ in Lostallo /Switzerland and EC-A-B Izmir/turkey

Dear sport friends,

- 1.) I would like to inform you that for the EC 40+ in Lostallo /Switzerland we will change the shore hardness for the 1:8 class from 32 (front) and 35 (rear) to 34 (front) and 36 (rear). The diameter will stay at 69mm front and 76mm rear. This decision was taken after reviewing the data gathered from recently performed tests by the tire supplier (UFRA) and the local organizer on the actual tire wear.
- 2.) I would also like to inform you that due to the fact that the organizer in Izmir shortly has layed a of new asphalt layer on the track. The final decision on shore hardness and diameter will be made after the upcoming Warm-Up race on the 4-5 July 2015.

In case you have further questions please do not hesitate to contact me.

Regards,
Josef Dragani
EFRA 1:10 Track Section Chairman.
