LAP TIMING DECODER:

The Organisers have confirmed they will be using MyLaps Decoder version 4.3. This version will record all MyLaps direct powered transponders.

Transponders not supplied by MyLaps can often be detected by this Decoder version, but competitors should be aware:-

"EFRA rules do not require the Time-Keeper to adjust results for missed laps or times, if a competitor is using a transponder that is not recommended by the Decoder manufacturer". (GR 8.12.3).

The TRACK:

The organisers have confirmed that the track will not be used by anyone after 8th July.

The track design will be the same that was used at the Warm-Up event. The features are permanent and cannot easily be changed.

Access to the camping area will be allowed from 15:00 hr. on Sat. 21st July.

It is mandatory that any competitor wishing to use the Camping area must Reserve a place.
