Municipality of Franciac

671110695 | 676127257

## 02 THE CIRCUITS

### ASPHALT SURFACE

Route designed by Iñaki Montessinos, a renowned specialist in Spain. It has a length of 380 meters and an average width of 5 meters.

It is a very demanding track due to its elevation changes, chicanes and high speed curves. It usually turns counterclockwise with 9 left turns and 6 right turns, triple chicanes and a main straight of 70 meters.

*A challenge for the most experienced pilots*

**70 M**

Main line

**9 CURVES**

To the left

**6 CURVES**

To the right

*Very peculiar and unique in Spain*

### GROUND SURFACE

Designed by the world champion Robert Batlle, a world-renowned specialist, it has a 350-meter rope and an average width of 4.90 meters. It is made up of variants of height and superelevations of 3D design to improve the riders' experience.

It is equipped with water drainage systems and automatic irrigation to avoid pulses, especially in summer.

**350M**

Rope

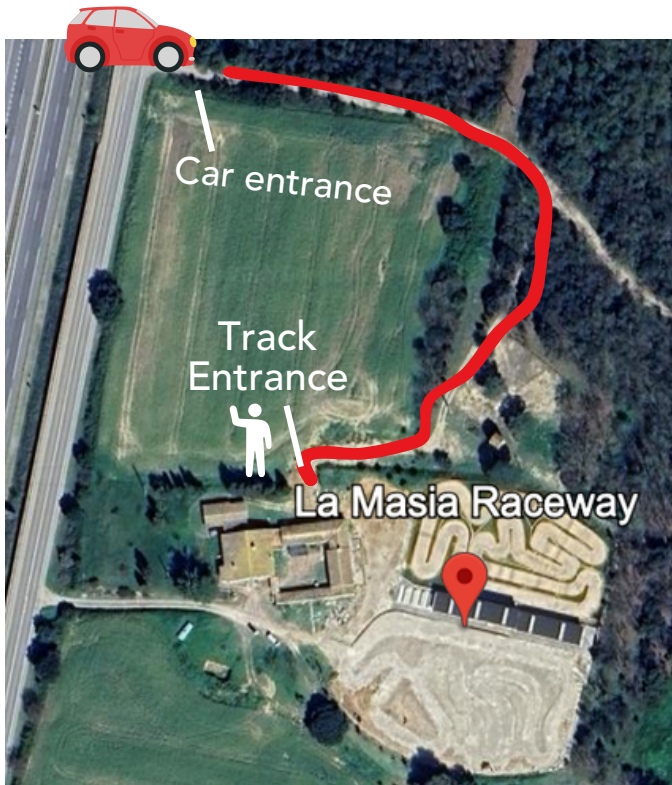

**4.90M**

Width medium

## 03 LOCATION

The Masia Raceway is located in Caldes de Malavella, in the municipality of Franciac, 19 minutes from the city of Girona.

 [Click here to open Google Maps](#)

41°51'53.2"N 2°46'36.9"E

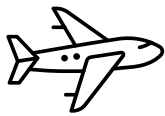

## 03 LOCATION

Caldes de Malavella is strategically located between Girona and Barcelona, making it a very attractive place to live or enjoy leisure activities.

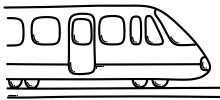

It is located in the heart of the Selva region, halfway between Girona (about 9.3 miles) and Barcelona (about 50 miles), giving it excellent connections to both cities.

**From Barcelona Airport** \_\_\_\_\_ **1h**

**From Girona Airport** \_\_\_\_\_ **5min**

**From Girona Station** \_\_\_\_\_ **15min**

## WELCOME TO GIRONA

The city is famous for its impressive old town, where the majestic Cathedral of Santa Maria with its unique Gothic nave, and the colorful hanging houses that line the Onyar River create an iconic sight.

In addition to its historical heritage, Girona offers a vibrant cultural, gastronomic and artistic scene, attracting visitors seeking an authentic and enriching experience.

Girona is also deeply connected to sport, especially cycling. Its mild climate, scenic routes through the surrounding countryside, and proximity to both the Pyrenees and the Costa Brava have made it a popular training base for professional cyclists from around the world.

It is an ideal destination for both a cultural getaway and for those wishing to explore the natural beauty of the region.

## 14 CLIMATE

Girona has a Mediterranean climate with continental influences. The climate of Girona is transitional Mediterranean, with relatively mild and rainy winters and hot and sunny summers.

The city is located in the northeast of Spain and Catalonia, about 25 km from the sea. The coast of the province of Girona is called Costa Brava.

The distance from the sea, although not very large, makes the climate a little more continental than on the coast, in addition, due to the northern position, near the border with France, the city is more exposed to the cold waves of November-March compared to Barcelona, and the rains are also more frequent.

The average temperature of the coldest month (January) is 7.5 °C, that of the warmest months (July, August) is 24 °C. Precipitation amounts to 720 mm per year: it is therefore at an intermediate level.
