CLUB PRESENTATION

The BOURG MINI RACING CAR (BMRC) was founded in 1977 by a group of model car enthusiasts with the aim of sharing their passion with beginners and training drivers who wanted to compete. Learning and sharing technical knowledge are essential to the club's members.

The club benefits from a privileged geographical location in the centre of France, making it accessible to all national and European pilots — less than 100 km from Switzerland and Italy. It is also directly accessible by plane, located on the edge of the TERRE DES HOMMES Bourg/Jasseron aerodrome.

Following our move in 2017, we have constantly improved the site (track and facilities) for the well-being of pilots and accompanying persons, which naturally led us to request, with the support of the FFVRC, a European Championship for the over 40s on our site.

We thank the EFRA for choosing us to organise this competition (August 28–31) in the beautiful Ain department, welcoming drivers from across European nations. We already organised a similar event in 2006.

TRACK & SITE INFORMATION

TRACK

Surface	Asphalt
Length	280 metres
